Dive deeper

The job

Are you an energetic, forward-thinking professional in the field of engineering and development?

Coordinates projects with City departments, outside agencies, and organizations, which include land development, storm water management, traffic design, pavement management, street improvements, lighting, facilities, and construction of capital projects.

Reviews and approves engineering plans for subdivisions, use permits, and encroachment permits.

Oversee the development review process, the City's \$40 million roadway widening project, and pavement management program.

Maintain effective working relationships with all levels of staff, partner agencies, and with the public.
